

GOVERNANCE

eHealth programmes require political-governance strategies to achieve health policy goals. This is an overview of the eHealth governance ecosystem in Norway:

ENTITY RESPONSIBLE FOR eHEALTH	NATIONAL eHEALTH GOVERNANCE BOARD	PUBLIC eHEALTH AGENCY
 Ministry of Health	 National Council Model for eHealth	 eHealth agency Helsenorge
eHEALTH TOOLS IN THE OUTPATIENT SECTOR	eHEALTH TOOLS IN THE INPATIENT SECTOR	COMPREHENSIVE CANCER CENTRES WORKING ON eHEALTH
 Partially covered by public resources	 Partially covered by public resources	 In place

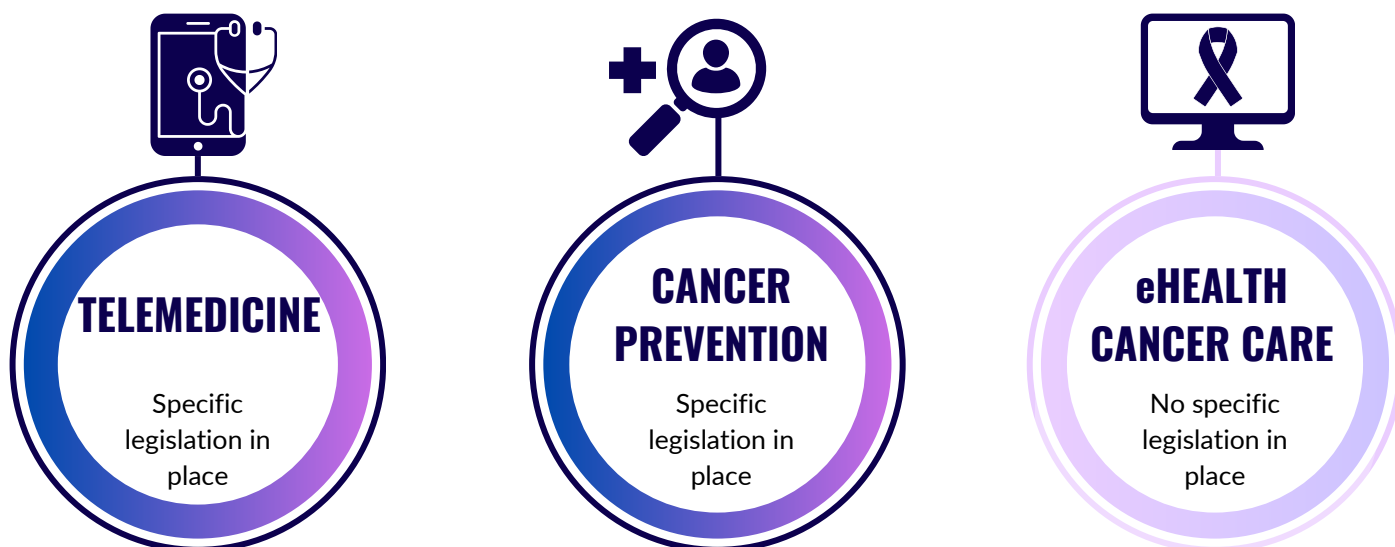

STRATEGIES

Norway has put in place specific strategies and policies for eHealth and cancer care:

LEGISLATION

The level of integration of eHealth in different countries also depends on how legislation responds to innovation needs. In Norway, telemedicine, cancer prevention and eHealth cancer care is regulated by:

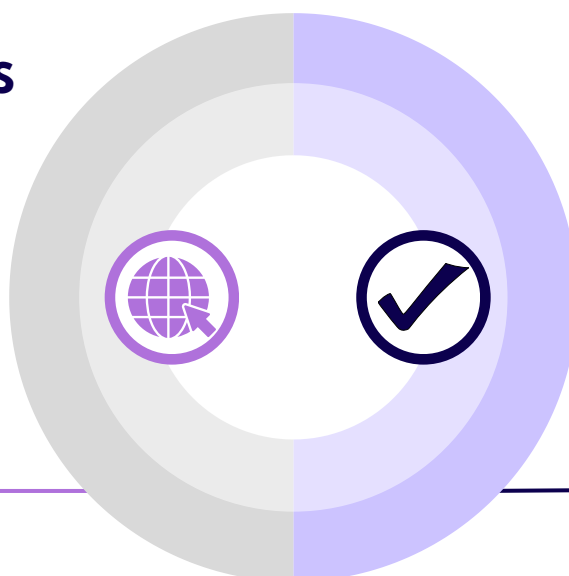

Note that where no specific legislation is in place, commonly, general legislation is applied.

CANCER SPECIFIC eHEALTH SOLUTIONS

A number of digital solutions are available in some countries for cancer patients. Some of them are commercial, whereas some others are offered and recommended by national public healthcare systems. In some countries, governmental institutions provide a list of solutions, such as eHealth apps, for cancer patients. In Norway:

RECOMMENDATIONS

No information available on websites or other resources recommended to the public.

CERTIFICATIONS

There is no specific certification for cancer e-health tools, however a general system for CE-marking of medical equipment, also e-health related is in place.
